Change Management Control

Software On Target

Software on target with your requirements, with your environment and with your budget. Change Management Control is a fully web based, secure enterprise change management application that fits in your budget and leaves room to breath. Based on ITIL standards and developed in response to the needs of clients from companies both large and small, Change Management Control is designed to be a flexible, secure and accessible solution.

Now more than ever conditions require a focus on technology that will maximize efficiency while maintaining accountability throughout any type of change. SLAM Change Management Control offers a fully web based solution that addresses this need comprehensively and affordably. Our robust system adapts to your existing or desired workflow with a straightforward user interface for ease of use across your entire workforce.
